Conference Sessions

Session 1 9:10 to 11:00 am	“Responding to the Unexpected”
Description	Bomb threats, suspicious packages and other unexpected threats...are these the new normal? What do these types of threats mean for those working in the fields of emergency management and business continuity? During this facilitated discussion panelists will share their experiences from recent incidents, along with lessons learned and thoughts on what your organizations can do to prepare to respond to the unexpected.
Presenters	Angela Epp , Winnipeg Police Service Helen Halliday , Delta Winnipeg Paul Van Hee , MB Justice Jacques Gagne , Director Security, WRHA Brian Miln , Former Bomb Unit Coordinator, Winnipeg Police and/or Air Berdesis , Bomb Unit Coordinator, Winnipeg Police

Session 2 11:15 am to 12:00 pm	“WRHA Flooded Access Centre-280 Booth Drive”
Description	<p>On a cold January morning in 2015, a water pipe burst inside the Winnipeg West Health and Social Services ACCESS Centre, flooding all three floors and forming story-high icicles on the exterior of the building. The ACCESS Centre had opened only seven months before, so no one expected something like this to happen! Extensive damage forced the relocation of 170 staff and the recovery of critical services for vulnerable clients including an on-site daycare, a primary care clinic, community mental health, public health, home care and social Services.</p> <p>Karen and Jeff will share insights gained from managing the incident response and recovery. Delegates will learn how the Command team designed an integrated Incident Command Structure to meet the unique needs of a complex organization. The value of collaboration, asset sharing and validating assumptions will also be explored. Delegates will take away road-tested tips for communicating with staff and the general public in a crisis, as well as what to include in your response plans.</p>
Presenters	Karen-Denise Cyr , Coordinator Disaster Management, Winnipeg Regional Health Authority Jeff Martin , Policy and Contingency Officer, Winnipeg West Integrated Health and Social Services

<p>Session 3</p> <p>1:00 to 2:00 pm</p>	<p>“The New Normal: Security planning for Sports and Entertainment Events”</p>
<p>Description</p>	<p>Safety and Security standards have been in place for professional sports and entertainment events for decades to protect the players/performers, attendees and the facilities hosting the events. Kim Boulet will share her experiences with changing industry expectations in response to recent disasters such as the Boston Marathon bombing and stage collapses at outdoor events.</p>
<p>Presenters</p>	<p>Kim Boulet, Director Security and Event Management, True North Sports and Entertainment Limited</p>

<p>Session 4</p> <p>2:05-3:05</p>	<p>“Climate Change and Impact on Disasters”</p>
<p>Description</p>	<p>Many people—if not most people—do not seem to fully appreciate that the climate of the Prairie Provinces is projected to become a very, very different climate in the coming decades. More importantly, they do not seem to understand that oft mentioned benefits of warmer winters and longer growing seasons will be overshadowed by costs and risks associated with many other aspects of the New Normal. A summary of what the latest climate models project for the coming decades will be presented.</p>
<p>Presenter</p>	<p>Dr. Danny Blair, Associate Dean of Science and Acting Principal of the Richardson College for the Environment, University of Winnipeg</p>

<p>Session 5</p> <p>3:05-3:30 PM</p>	<p>“Insurance Industry Trends”</p>
<p>Description</p>	<p>Changes in the Insurance industry impact both individual and corporate/organizational risk management planning. Hear about the latest trends and how your Insurance provider can be an partner in your preparedness efforts.</p>
<p>Presenter</p>	<p>Shale Reider, Managing Partner, Reider Insurance</p>

<p>Session 6</p> <p>3:35-4:35 pm</p>	<p>“Infrastructure Risk Response and Mitigation” Panel Presentation</p>
<p>Description</p>	<p>We have an ever increasing reliance on an infrastructure which is fallible. This panel will explore what risks exist, what they are doing to help mitigate those risks and what you need to consider in your emergency and business continuity plans.</p>
<p>Presenters</p>	<p>Ron Andrews, Assistant Director MIT (Facilitator and Presenter) Bob Schkawritka, Manitoba Hydro Todd Georgeson, MTS Data Centre</p>
